Conference venue and date:

 September, 20 - 22, 2023

 ICISE, Quy Nhon, Vietnam

Important Dates

15/08/2023

Abstract submission deadline

30/08/2023

Acceptance announcement

20-22/9/2023

Conference date

Conference Themes

In 2023, the BIO2023 Quy Nhon will focus on the general themes **"From Connections to Collaborations"** in different sectors of life sciences with the following topics:

- Fundamental and applied researches in the field of plant biotechnology
- The diversity and importance of microbiology in addressing current global challenges, such as food security, environmental sustainability, and health.
- Application of advantages from OMICS, big data analysis and artificial intelligence in improvement of human healthcare, food safety, and environment.

There will be 4 concurrent sessions, respectively:

- Plant Biology
- Microbiology
- Human Biology
- Animal Biology

Conference format

The conference will use a range of formats: Keynote speaker presentations in the plenary session, poster exhibitions, oral presentations in the parallel sessions, exhibitions and training courses from private companies and enterprises operating in the fields of Biology, Medicine and Pharmacy, Agriculture and Environment open roundtable discussions. The excursions will also be offered to raise the opportunity for all participants to visit the beautiful places around Quy Nhon city and to make further networking in nature.

Conference activities

Plenary session: A total of 8 national and international keynote speakers will give their talk in the plenary sessions. There will be one plenary session each morning. Please explore the homepage of the conference to learn more about the invited key note speakers, the title and abstract of their oral presentation.

Concurrent sessions: Delegate oral talks will be presented during parallel sessions. Detailed regarding the number and arrangement of the parallel sessions will be posted on the homepage of the conference after we have received and evaluated the abstracts

Poster sessions: Posters will be presented in the afternoon of day 2.

Group and general discussions: We plan one-hour discussion in small groups just after each parallel session to address key methodological limitations depicted from oral presentation by junior researchers. Before closing session, a general discussion will be delivered with the current issues related to the main themes of the conference.

Outdoor activities and Team building: This session will provide more time for delegates to freely discuss, exchange, and promote networking amongst junior researchers. This session will be organized in the afternoon of day 3. The conference will be closed by the end of this activity. Delegates can feel free to discover around Quy Nhon city and enjoy its delicious seafoods. More details will be informed you officially.

Conference Awards: The awards will be designated to reward presentations of excellent investigation. A committee of experts will evaluate the abstracts and presentations and will select the best talks and poster presentations. The conference will also reward the excellent women scientists and good Vietnamese ethnic-minority researchers.
